

2000 VEGETABLE, MELON, AND TARO HIGHLIGHTS

VEGETABLES AND MELONS

Total production of vegetables and melons for 2000 is estimated at 97.7 million pounds, down 2 percent from 1999's record high output. Despite the drop in production, farm revenues were at a record high \$45.5 million, up 6 percent from 1999.

Although weather conditions remained generally dry in 2000, the overall situation did not get severe enough to adversely affect the vital flow of irrigation water to farmers. As a result, average yields were higher for a majority of the State's vegetables and melons as crops benefitted from generally sunny skies, moderate temperatures, and adequate irrigation.

Leading all individual vegetables and melons in terms of farm value were tomato growers with \$8.6 million in 2000, up 9 percent from 1999. Watermelons were a distant second at \$3.2 million, up 32 percent. Tomatoes also lead all individual vegetable and melons in terms of volume with a 2000 harvest of 16.5 million pounds, down 2 percent from 1999's record-high of 16.8 million pounds. A boost in yields kept head cabbage growers in second place with production estimated at 14.6 million pounds, up 2 percent from 1999 and the second largest harvest in the past 8 years.

TARO

Hawaii taro production is estimated at 7.0 million pounds for 2000, up 3 percent from 1999 and the highest total since 1978. The combined farm price for poi and Chinese taro averaged 53 cents per pound in 2000, unchanged from the record high achieved in 1998. The boost in production, combined with steady farm prices, enabled taro farmers to post farm revenues of \$3.7 million, up 3 percent from 1999 and a new record high.

Taro for processing totaled 6.8 million pounds in 2000, up 5 percent from 1999. Most of the processed taro is made into poi. In 2000, that amount totaled 6.7 million pounds, an 8-percent increase from 1999. Weather conditions were generally favorable for taro growing with mostly sunny skies and adequate water available for most of the year. The absence of any major flooding also helped taro growers. In addition, farmers continued to refine cultural practices to combat the persistent presence of the Taro Pocket Rot disease and the destructive presence of Apple snails.
